

在5個數字的時鐘上試試看乘法和除法

$$2 \times 3 = \underline{\quad} \pmod{5} \quad 3 \times 1 = \underline{\quad} \pmod{5}$$

$$1 \times 4 = \underline{\quad} \pmod{5} \quad 4 \times 4 = \underline{\quad} \pmod{5}$$

$$5 \times 2 = \underline{\quad} \pmod{5} \quad 3 \times 2 = \underline{\quad} \pmod{5}$$

$$3 \times 4 = \underline{\quad} \pmod{5} \quad 5 \times 4 = \underline{\quad} \pmod{5}$$

$$3 \times 3 = \underline{\quad} \pmod{5} \quad 4 \times 3 = \underline{\quad} \pmod{5}$$

$$1 \div 4 = \underline{\quad} \pmod{5} \quad 1 \div 2 = \underline{\quad} \pmod{5}$$

$$1 \div 3 = \underline{\quad} \pmod{5} \quad 2 \div 4 = \underline{\quad} \pmod{5}$$

$$5 \div 3 = \underline{\quad} \pmod{5} \quad 4 \div 3 = \underline{\quad} \pmod{5}$$

$$4 \div 2 = \underline{\quad} \pmod{5} \quad 3 \div 2 = \underline{\quad} \pmod{5}$$

$$2 \div 3 = \underline{\quad} \pmod{5} \quad 3 \div 4 = \underline{\quad} \pmod{5}$$

來試試看更好玩的~ 如果在 7個數字 $\pmod{7}$ 的時鐘上會如何呢?
